Education

Vietnam National University - University of Engineering and Technology

- *B.S. Computer Science* *2017-2021*
  Thesis: Link Prediction on Knowledge Graph Using Graph Neural Network

Research Interest

My current interest mainly focuses on the robustness and trustworthiness of deep models, ranging from adversarial attacks and backdoor attacks to generalization. I aim to understand what makes the model vulnerable to such problems and how to make the model more robust and resilient to security threats. I am also interested in interpreting the behavior of diffusion models and language models.

Experience

- **MAIL Research - VinUni** *2023 - Now*
  Research Assistant & Teaching Assistant. Supervised by Prof. ***Khoa Doan****.*
  Conducted research on adversarial attacks, backdoor attacks, generative models, and interpretability. Prepared materials for Artificial Intelligence, Machine Learning, and Data Mining courses.
- **Sun* R&D Unit** *10/2021 - 11/2022*
  AI Engineer
  Worked with Voice of Vietnam to build a text-to-speech model to generate high-quality audiobooks.
- **Math and Science Summer Program** *7/2021*
  Mathematics Mentor
  Topic: Error-correction code.
- **Knowledge Technology Laboratory - VNU** *2020/2021*
  Undergraduate research student. Supervised by Prof. ***Phan Xuan-Hieu****.*

Publications

- **Quang H Nguyen**, Nguyen Ngoc-Hieu, The-Anh Ta, Thanh Nguyen-Tang, Kok-Seng Wong, Hoang Thanh-Tung, Khoa D Doan. "Wicked Oddities: Selectively Poisoning for Effective Clean-Label Backdoor Attacks." International Conference on Learning Representations (2025).
- Cao-Duy Hoang, **Quang H Nguyen**, Saurav Manchanda, Minlong Peng, Kok-Seng Wong, and Khoa D Doan. "Fooling the Textual Fooler via Randomizing Latent Representations." Findings of the Association for Computational Linguistics (2024).
- **Quang H Nguyen**, Yingjie Lao, Tung Pham, Kok-Seng Wong, and Khoa D Doan. "Understanding the Robustness of Randomized Feature Defense Against Query-Based Adversarial Attacks." International Conference on Learning Representations (2024).
- **Quang H Nguyen**, Ngoc-Hieu Nguyen, Thanh Nguyen-Tang, Hoang Thanh-Tung, Khoa D Doan. "Clean-label Backdoor Attacks by Selectively Poisoning with Limited Information from Target Class." NeurIPS 2023 Workshop on Backdoors in Deep Learning-The Good, the Bad, and the Ugly. (2023).
- Nguyen Ngoc-Hieu, **Quang H Nguyen**, The-Anh Ta, Thanh Nguyen-Tang, Khoa D Doan, Hoang Thanh-Tung. "A Cosine Similarity-based Method for Out-of-Distribution Detection." ICML 2023 Workshop on Spurious Correlations, Invariance and Stability (2023).

Preprints

- **Quang H Nguyen**, Hoang Phan, Khoa D Doan. "Unveiling Concept Attribution in Diffusion Models." (2024).
- Sze Jue Yang, Chinh D La, **Quang H Nguyen**, Kok-Seng Wong, Anh Tuan Tran, Chee Seng Chan, Khoa D Doan. "Synthesizing Physical Backdoor Datasets: An Automated Framework Leveraging Deep Generative Models." (2023).

Professional Services

- Reviewer at NeurIPS 2024 (Top Reviewer), ICLR 2025, AISTATS 2025, CVPR 2025.

Technical Background

- **Programming languages**: Python. Experience working with Pytorch, Numpy, HuggingFace, Pyspark.
- **Machine learning**: Security in machine learning, diffusion models and large language models.
- **Mathematics**: Probability theory, statistics, analysis, linear algebra.

Additional Activities

- Contributed to the Vietnamese translation of the book "Interpretable machine learning".

Mentoring

- Phan Hoang. Undergraduate student at VinUniversity.
